Baton Dual Globe Sconce

Type: Sconce

Globe type: 2 G9 LED

Voltage: 110V-220V compatible

Wattage: 5W

Environment: Indoor

Installation: Hard Wired Wall Sconce

Elevate your interior design with a lighting fixture that is both a functional art piece and a source of sophisticated ambience. The [Brand Name] Sculptural Stone Wall Sconce is a striking fusion of natural organic texture and minimalist modern form.

Each Piece is One-of-a-Kind

At the heart of this sconce is a meticulously crafted cylinder of dramatic, highly-figured natural stone—each piece featuring its own entirely unique pattern of deep black, soft grey, and warm cream-colored veining. The complex patterns (as seen in the detail close-up, Image 0) ensure that no two fixtures are identical, making every piece a bespoke installation for your home.

A Warm, Captivating Glow

When illuminated, the sconce becomes a dynamic element in your space. Soft, warm light permeates the translucent sections of the stone, revealing subtle, golden-amber pockets within the veining that cast an inviting, diffused glow. This ambient light is complemented by a focused upward illumination (visible in Images 0 and 1), which washes the wall above with a warm light beam, perfect for creating mood and dimension.

Refined Architectural Details

The organic stone cylinder is anchored by a clean, brushed bronze architectural mounting bracket. The warm metal finish provides a perfect contrast to the cooler stone tones and dramatic veining, creating a harmonious and sophisticated aesthetic.

INSTALLATION

STEP 1

Locate & Mark

- Hold the hanging base against the wall at the desired height.
- Use a level to ensure it's straight, then mark screw hole positions.
- Verify no electrical wires/pipes are behind marked spots

STEP 2

Drill & Secure

- Drill holes at marked points using a masonry bit (for concrete/brick) or wood bit (for studs).
- Insert wall plugs (expansion anchors) if needed.
- Align the hanging base with holes and fasten using screws. Ensure it's firmly attached

STEP 3

Connect Wires

- Important: Confirm power is OFF
- Feed home wiring through the base's center opening.
- Secure with wire nuts or terminal blocks. Wrap connections with electrical tape.
- Tuck wires neatly into the electrical box.

STEP 4

Align the lamp body with the mounted base.

Restore Power & Inspect

- Turn power back on at the breaker.
- Test the light. Check for flickering, unusual sounds, or heat.
- If issues occur, immediately turn off power and recheck connections.
